New—Crazy Bullfighting Machine

New—Crazy Bullfighting Machine

This product is a life-size machine bull controlled by the computer. It can simulate a real bull to move up and down, fast and slowly, bump and hit while roaring, which is full of savage and thrill. One has to use his wit's end to conquer it. It greatly meets the strong desire of modern citizens to conquer and seek thrill. This machine has so many advantages such as: novelty and thrill, low costs, small investment, wide application range and high participation, etc. It can be easily managed by two staff in a 8-10 m² room. Indoor venues such as: bars, shopping malls and outdoor places like parks, squares, pedestrian streets, etc, are all suitable places. Although the bullfight scenes in television are thrilling and deeply loved by everyone, the risks of which threaten many participants. The advent of this machine enables more people to have the chance to experience bullfights, which has been responded by many people. In a popular operation

venue, where the braves want to flourish their courage under the eyes of the crowds, they jump on the mad bull and put forth full strength to fight against the mad bull. Losers fall down in the scream of onlookers, while the winner puts on a cowboy hat, which is the symbol of victory, in the cheers of the crowds. But this is not over. Losers are not content to be outdone and winners are longing for another victory fruit, while onlookers are itching for a fight and the operators are gaining endless wealth.
